

Who benefits from Service-Enriched Housing?

Service-Enriched Housing (SEH) is affordable and accessible housing that integrates a robust menu of social services and other supports into its daily operations to promote stability in the lives of vulnerable residents. SEH could include rental or ownership homes and may feature healthy housing and universal design standards. By offering a wide array of services, SEH providers support diverse low and moderate-income families and individuals ranging from the fragile elderly living alone to disabled veterans to those experiencing homelessness, allowing them to live with dignity and achieve optimal self-sufficiency.

This fact sheet highlights the numbers and needs of just a few vulnerable groups in **San Antonio and Bexar County** who might benefit from living in SEH.

Almost **55,000** families earn less than \$25,000 for a family of four

\$942

average monthly rent

More than **38,000** households have SSI disability income

\$760

average per month

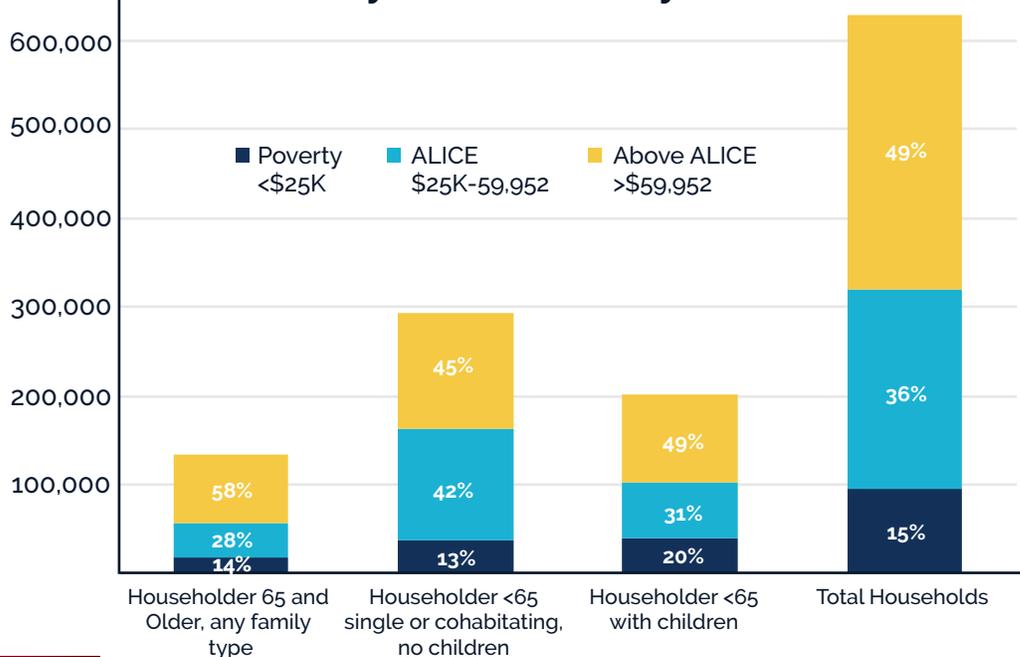

4 in 10 veterans have a disability

9,000

veterans live in poverty

Who is struggling?

Bexar County Households by Income, 2016

Asset Limited, Income Constrained, Employed (ALICE)—these are the people who earn more than the Federal Poverty Level, but less than the basic cost of living for the county.

Half of households can't afford the basics.

Who benefits from Service-Enriched Housing?
