

Request for Proposals for Crime Prevention Through Environmental Design (CPTED) Training

Background: LISC Safety provides training and technical assistance to place-based crime prevention efforts in cities around the country. This includes technical assistance (TA) activities associated with an award from the U.S. Department of Justice (DOJ) Bureau of Justice Assistance (BJA) under the Byrne Criminal Justice Innovation Program (BCJI). As part of the White House Neighborhood Revitalization Initiative (NRI), BCJI supports comprehensive place-based and community-oriented initiatives that engage leaders from multiple sectors and disciplines to work together to reduce and prevent crime and revitalize communities. Local BCJI grantees are planning and implementing responses to the drivers of crime in persistent problem areas in their communities using a range of evidence-based strategies involving enforcement, prevention, intervention and treatment. Program priorities include strong use of research and data to guide decision-making; ongoing community engagement; and integrating crime responses with broader neighborhood revitalization activities.

Project Scope of Work: LISC seeks a consultant or organization to deliver an on-site training related to Crime Prevention Through Environmental Design (CPTED) in Baltimore, MD. Expectations of the consultant or organization will include:

1. Crafting an 8-16 hour training with a proposed training structure over time, for approximately 10-20 people representing community based organizations, residents, law enforcement and other community partners, government stakeholders in support of local BCJI efforts;
2. Conducting planning calls and/or meetings with LISC and/or the Baltimore, MD BCJI site to customize the CPTED training and work with site representatives to identify and assess areas in the target area for potential CPTED deployment;
3. Curriculum and materials development appropriate for a diverse audience of trainees that covers strategies to prevent crime by addressing the physical environment and through collaborative problem-solving partnerships.

Qualifications

- Consultants must have at least five years' experience developing technical assistance resources and/or on-site trainings related to Crime Prevention Through Environmental Design (CPTED), SafeGrowth, or other crime prevention strategies.
- Knowledge of the field of community development is a plus.

How to apply

Please submit the following to Ashley Jackson at ajackson@lisc.org

1. A summary of recent and relevant projects and relevant academic expertise.
2. Proposed payment schedule based on major deliverables/phases of this project.
3. Resumes and/or description of qualifications/background of key staff to deliver the training.
4. Names, phone numbers, and e-mail addresses of three professional or academic references.

Selection criteria

- LISC shall enter into contracts only with responsible contractors who possess the ability to perform the tasks outlined in this RFP within the maximum allotted budget.
- LISC will select a proposal that demonstrates the applicant has had experience successfully completing similar projects and that clearly shows how the applicant will meet the tasks and goals outlined above.
- LISC will select the proposal that best reflects the priorities of the BCJI program and is best-suited to the needs of the Baltimore BCJI site.
- Proposals should describe a plan of action as well as relevant technical knowledge or skill, such as previous experience with CPTED.
- LISC will also consider in each selection of a consultant evidence of whether consultant has been designated by a local or state government as a small, minority, or woman-owned business.
